CORE WEB DEVELOPMENT PROJECTS

Advanced Weather Dashboard

- Developed a responsive, dynamic weather application leveraging APIs to provide users with real-time, accurate weather updates and forecasts.
- Optimized UI components to ensure seamless rendering across mobile, tablet, and desktop viewports.

Interactive Single-Page Resume Website

- Designed and built a personal portfolio site featuring a smooth dark/light mode toggle and custom project filtering.
- Utilized advanced DOM manipulation and modern CSS layouts to deliver an exceptional user experience.

AI Poem Generator

- Engineered an innovative web application utilizing artificial intelligence concepts to dynamically generate creative poetry based on user inputs.

Python Shopping Cart & Contact Book

- Created backend-focused applications demonstrating robust object-oriented programming logic, efficient data handling, and structured database management.

WORK EXPERIENCE

Sales Agent | Respublica Student Living (Johannesburg) *January 2024 – March 2024*

- Promoted high-density student accommodation services, successfully converting prospective leads and contributing directly to team sales targets.
- Managed daily administrative tasks, maintained accurate client databases, and resolved inquiries with a high standard of professional customer care.

Retail Sales Assistant (Seasonal) | Yuppiechef (Johannesburg) *December 2025*

- Delivered exceptional, high-touch customer service during high-volume peak trading windows to maximize store revenue.
- Collaborated with floor managers to maintain meticulous stock organization and visual presentation standards.
